PROFI LINE

TTmatic 505

New dimensions in robot training – the complete know-how of 33 years of table-tennis robot production is built in this top machine.

A clever five-channel remote control computer and a specially developed double head-system offer training perspectives which fill every table-tennis professional with enthusiasm.

505 A - Net fasted on the table.
505 B - Net fasted on the machine - on castors.

TTmatic 303

A stable training robot with automatic ball returner. The thoroughly solid TTmatic construction guarantees an uninterrupted training even with this simple electronic remote control system. Movable with automatic ball returner.

303 C incl. net CLASSIC C
303 A incl. net PROFI A

TTmatic 404

The natural flight of the balls, the minimum time for setting up the machine, and the easy handling contribute to the fact that this robot will soon become an indispensable assistant to every trainer. Through the electronic remote control board you can programme innumerable variations of table tennis stroke techniques. With one turn you can change the rotating-head from chopped balls to side-spin or topspin balls. The large net together with the perfect automatic ball returner guarantee an uninterrupted training.

404 A - Net fasted on the table.
404 B - Net fasted on the machine - on castors.

Ø 38 mm

Now all the new TTmatic machines work with both the 38 mm- and the 40 mm-ball.

A simple automatic change over mechanism means that no manual adjustment is necessary.

Ø 40 mm

TTmatic 101

An untiring training partner especially for the beginner and hobby player.

Spinballs, counter-shots and even simple topspin balls belong to the repertoire of this reasonably priced machine.

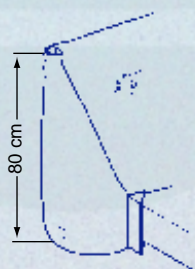

TTmatic 202

A quick setting up, easy handling and a reasonable price make this machine very interesting for both constructive training with juniors and hard training with top players who want to improve their stroke techniques and their physical conditions. A strong dynamic main motor guarantees good spin quality. The large ball container promises long training periods.
